

OSHA 10 - NEW REQUIREMENTS

Connecticut State Law requires that everyone on a prevailing rate construction project must have completed a **minimum** of 10 hours of safety training within the past 5 years. Proof of training (IE: OSHA card) must be provided and the completion date of the training can be no more than 5 years earlier. Those who have completed an OSHA 30 Hour Safety Training class more than 5 years ago must take an OSHA 10 class to satisfy the Connecticut 5-year requirement. **Example: OSHA Card (10 or 30) issued 01/01/2009 expires 01/01/2014 in Connecticut; another full 10-hour OSHA Safety Training class is required.**

Many contractors, construction managers, owners, etc. are adapting the Connecticut 10-hour Safety Training requirement with the 5-year expiration rule as part of their safety policies, even on non-prevailing rate projects. If you are not yet certified, or if your OSHA 10 or 30 card is older than 5 years, please call our Training Department at (877) 999-5088 to schedule yourself for a class.

Additional information:

- ✘ This 5-year rule is unique to Connecticut only
- ✘ The US Department of Labor OSHA does not have expiration dates
- ✘ There is no OSHA refresher - participants must attend the entire 10 hour class
